

Injection Reiniger (Injection Cleaner)

DESCRIPTION

Injection Cleaner is a highly effective combination of active agents for cleaning and protection. This product is formulated in accordance with the latest standard of fuel and additive technology and meets the requirements of today's engines, fuels and running conditions. Suitable for all gasoline fuel injection systems such as K, KE and L-Jetronic systems, etc.

PROPERTIES

- cleans the injection system of fuel residues
- removes carbon deposits as well as deposits from distributors, injection valves and inlet valves and other components of the fuel system
- effective in all injection systems
- especially suitable for engines with catalytic converters
- ensures optimum handling performance and low fuel consumption due to precise injection dosage and atomization
- guarantees low levels of pollutants in the exhaust

TECHNICAL DATA

Base	:	Additives in carrier liquid
Color	:	Yellowish
Density at 20 °C	:	0.79 g/cm ³
Regulation on flammable liquids (German)	:	A II
Flash point	:	41 °C

APPLICATIONS

For rectifying problems such as difficulties with starting, irregular idling, poor throttle response, performance losses, surges due to lean mixture and poor exhaust values caused by contaminated injection systems. Repeat treatment if problems reoccur.
Suitable for all gasoline injection systems.

APPLICATION

One 300 ml can is sufficient for up to 70 liters of fuel. This product is effective over 2,000 km. Injection Cleaner can be mixed with fuel at any time since mixing is spontaneous.

AVAILABLE PACK SIZE

Injection Cleaner	300 ml	can	Part no. 5110 D-F-NL
	300 ml	can	Part no. 1918 D-F-I
	300 ml	can	Part no. 1971 D-PL-H-RO-TR
	50 l	drum	Part no. 5113 D
	205 l	drum	Part no. 4036 D
