

Pro-Line Diesel Intake System Cleaner

DESCRIPTION

Special active solvent with a high-tech additive combination for removing typical contamination and deposits found in the diesel intake and throttle valve areas. Dissolves and removes all greasy deposits and contaminants such as oil, resins, adhesive residues, etc. Guarantees operability of all moving parts and reduces fuel consumption. Increases the reliability of diesel-powered engines.

Important: Only suitable for use in diesel engines.

Recommended for preventative use during the inspection. Suitable for vehicles with EGR (exhaust gas recirculation) valve and DPF (diesel particulate filter).

PROPERTIES

- Rapid and effective cleaning
- Cleaning without dismantling
- Easy to use and economical
- Suitable for EGR valve and DPF

TECHNICAL DATA

Base	: mixture of solvents
Color	: amber/cloudy
Form	: liquid/aerosol
Odor	: characteristic
Density	: 1.00 g/ml

AREAS OF APPLICATION

Removes contamination and deposits in the intake and throttle valve areas, which disrupt smooth engine running. Use of the cleaner is recommended during every inspection in order to prevent heavy deposits.

Only suitable for use in diesel engines.

APPLICATION

Create access to the intake pipe and remove contamination by means of a spray stream. Thanks to the long spray probe, the entire intake duct can be cleaned. Start engine and clean the admission tract in short spray intervals (2-3 second) with the engine running (2000 rpm). With an extreme increase in rpm (>1000 rpm) during treatment, stop the dosage of the spray rate.

Important: Application only with engine running.

AVAILABLE PACK SIZES

Pro-Line Diesel Intake System Cleaner	400 ml Part no. 5168 D-GB-I-E-P
	400 ml Part no. 2388 D-NL-F-GR-ARAB
	400 ml Part no. 2858 D-DK-FIN-N-S
